BY DIRECTION OF THE COMMANDANT OF THE MARINE CORPS

OFFICIAL

A handwritten signature in black ink, appearing to read "J. G. Kines", written in a cursive style.

J. G. KINES, for  
Director, Materiel Support Division  
Marine Corps Logistics Bases  
Albany, Georgia

DISTRIBUTION: PCN 123 089541 00

## PREFACE

### SCOPE

1. This publication lists all components and accessories for collection-type supply items, such as major combinations, systems, groups, outfits, kits, sets or assortments. The components to be issued with the end item are identified under the heading of "SUPPLY SYSTEM RESPONSIBILITY" and when required, under the heading "COLLATERAL MATERIEL." End items requiring collateral materiel are governed by whether the end item is initial or replacement issue. The Commander, Marine Corps Logistics Bases, 814 Radford Boulevard, Albany, Georgia 31704-1128, will direct whether the issue of the end item is with collateral materiel or without collateral materiel. Those items listed under "USING UNIT RESPONSIBILITY" heading are to be requisitioned separately through the supply system when applicable. Using Units are also responsible for requisitioning the required publications to support the end item identified by the ID number shown on the cover of this SL-3. The end item will be complete when the total quantity of items, as applicable, shown in the SL-3 is on hand.

### LIST OF COMPONENTS

2. This listing comprises the major portion of this publication. The data, arranged in columnar form, presents the information needed to identify the item and determine its type of issue.
3. Item Number (Column 1). This column specifies a number assigned to each item as it appears in the list. Numbers are assigned in sequence and are for reference purposes only.
4. Stock Number (Column 2). This column furnishes the National Stock Number (NSN) assigned to the item.
5. Reference Designator/Figure-Key (Column 3). This column contains alphabetical and/or numerical designators for referencing individual components or items to an illustration. The absence of a reference designator indicates there is no illustration for the item.
6. Model (Column 4). This column indicates in alphabetical code the specific application of components, or assemblies when more than one model of the end item is contained in this publication.
7. Item Identification (Column 5). This column provides the item name and description listed under the heading of either "SUPPLY SYSTEM RESPONSIBILITY," "COLLATERAL MATERIEL" or "USING UNIT RESPONSIBILITY." (See paragraphs 10, 11, and 12.)
8. Unit of Measure (Column 6). This column gives the measurement standard of each item. It may or may not be the same as the unit of issue. For example, the unit of issue of a certain wire is coil but only 4 feet are required for the end item. Therefore, the unit of measure shown will not be used for requisitioning purposes. For the proper unit of issue and other required management data, refer to the applicable Management Data List (ML) when requisitioning.
9. Quantity Used in Unit (Column 7). This column lists the total quantity of an item, according to the unit of measure, required for full functional operation of the end item.

### SUPPLY SUPPORT CATEGORIES

10. Supply System Responsibility. A list, in alphabetical sequence, of items that are furnished with and must be turned in with the end item. Any item requiring replacement is the responsibility of the holding organization or using unit.
11. Collateral Materiel. A list, in alphabetical sequence, of items that are supplied with the initial issue of the end item and are retained by the unit. The "9999-00-000-0000" NSN shown under the heading of "COLLATERAL MATERIEL" is for control within the distribution system only, and is not authorized for requisitioning purposes.
12. Using Unit Responsibility. A list, in alphabetical sequence, of items that will not be issued with the end item. They must be requisitioned, as required, through the supply system by the using unit or holding organization.

### 5TH ECHELON REHABILITATION PROGRAM

13. Major items returned under this program will be evacuated under the provision(s) of the applicable Marine Corps Order(s) with the items listed under Supply System Responsibility. Rebuild and replacement under a 5th Echelon rehabilitation program will be

limited to these items only. Those items under the heading "COLLATERAL MATERIEL" and using unit items shall be held by using organizations for application to the replacement end items.

### CHANGES

14. Changes to this publication will be kept current by and issued as Page Inserts and/or Replacement Pages.

### REQUISITIONING OF PUBLICATIONS

15. Publications stocked by the Marine Corps shall be requisitioned as set forth in the current edition of UM-MCPDS 5605, the User's Manual for the Marine Corps Publications and Distribution System. Failure to comply with these instructions may result in return of the requisition or delay in processing.

### PUBLICATIONS FEEDBACK

16. Technical publications play a critical role in achieving system and equipment readiness. Because of this factor, the currency and accuracy of the data published in these documents are essential. Form NAVMC 10772, Recommended Changes to Publications/Logistics-Maintenance Data Coding provides a medium for accelerating information feedback to effect the necessary corrections, changes, and/or revisions, as appropriate. Typographical errors and FSC changes need not be reported. Using units shall requisition Form NAVMC 10772 through the normal Marine Corps supply channel. If this form is not adequate to cover a particular situation or recommendation, a letter should be directed to the Commander (Code 820), Marine Corps Logistics Bases, 814 Radford Boulevard, Albany, Georgia 31704-1128.

### MISCELLANEOUS

17. For full information concerning the Marine Corps Stocklist publications, see the current edition of MCO P5215.17, The Marine Corps Technical Publications System.

### INVENTORY SHEET

18. Inventory Sheet is to be used for monthly inspection and may be reproduced locally by the user as required. The user may indicate in the first column the month of the first inventory.

### SPECIAL NOTE

19. Items without an NSN assigned should be requisitioned by part number and/or drawing number. When NSN's have been assigned, changes to this SL-3 will be published.

8115-01-371-3690	BOX, SHIPPING	EA
TECHNICAL DATA		
FUNCTIONAL DESCRIPTION:		
<p>The Shipping Box, hereafter referred to as the box, is a light weight storage box used primarily for quick, easy access to deployed materials. The box is equipped with rings and may be tied down during shipment or lifted by forklift through staid slots or carried aloft. Handles are provided for transportability by personnel. The box is sealed and provides protection of contents in inclement weather. The box is not water tight, however, door gaskets and latching assembly provide a tight seal. The box is constructed of high strength, reinforced fiberglass. The box may be equipped with inserts or shelves for expanded uses.</p>
